Subject: Mechanical Associates

To Whom It May Concern:

California Waterfowl Association has been purchasing gates from Mechanical Associates for the past 8 years. We appreciate the fact that Mechanical Associates has the ability to customize products for our unique project needs. Dan Eggleston is extremely knowledgeable and has assisted in the design on several projects, and also has incorporated many of our own ideas.

Our orders have always been shipped in a timely manner and their customer service is excellent. California Waterfowl has been instrumental in the implementation of Mechanical Associates' new products and designs. If there have been any issues, Mechanical Associates has always been swift and fair in the resolve. Mechanical Associates provides quality water control gates for our installations, which are under corrosive conditions.

It is with great pleasure that I offer my letter of recommendation for Mechanical Associates.

Sincerely,

A handwritten signature in black ink, appearing to read "R. Eddings".
