Subject: Mechanical Associates

Re: Letter of Recommendation

To Whom it May Concern:

Mechanical Associates manufactured and provided slide gates, weir gates and telescopic valves for our project at the Kerman Waste Water Treatment Plant facility. Because of our experience with MA on this project and on yet one other, the Grundfos Pump Water Conservation project, for which they provided flap and spigot back canal gates, it is our great pleasure to offer this Letter of Recommendation.

From the onset of this relationship, the dedication of the product line by the MA team was quite obvious. Always accommodating and available, Dan Eggleston exhibits an exhaustive knowledge of his product. On both projects, upon placing the order, submittals were returned to us timely and accurately with no revisions required. Upon the approval of the submittals, the gates were manufactured within the time frame given us during order confirmation. Delivery was uneventful and the gates were shipped promptly on the date and at the time given. Upon receipt and inspection of the gates, they were found to be per specification without flaw.

Mechanical Associates has our complete endorsement. Clark Bros. Inc. would encourage entities seeking a gate supplier to utilize Mechanical Associate's valued customer service, extensive knowledge and excellent craftsmanship.

Sincerely,

A handwritten signature in black ink, appearing to read "Molly Jones", is written over a light blue circular stamp.

Molly Jones  
Project Manager
