To Whom It May Concern:

I have been working with Mechanical Associates as a representative in the Alabama region for over the last 7 years previously with Summit Pipe and now currently with Ferguson Waterworks. Mechanical Associates has been supplying the needs of municipalities, farming, and irrigation in our area. Mechanical Associates successfully includes specification writing, bidding, submittal packages and finally providing high quality stainless steel fabricated slide gates, stop plates, mudd valves, and other water control elements used in the field.

We are more than willing to work with Mechanical Associates because they respond in a timely manner while attending to the needs of the customer and producing a high quality product. Their entire staff will go the extra mile to make sure the customer is satisfied and has a reliable product.

If you have any questions please feel free to call me
